TREATMENT PLAN

Your plan, step by step

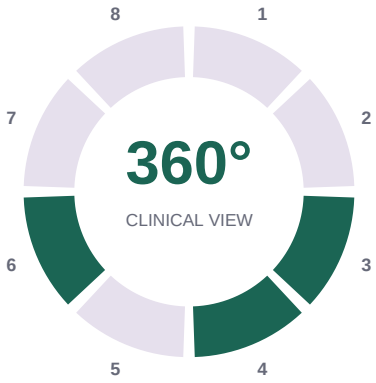

Prepared for

Patient DEMO

Treating clinician: Demonstration clinician
Document date: Oct 21, 2026
Reference: MPD-DEMO-001 | Plan status: Presented

360° clinical overview

1. **Alignment and position**
   No record
2. **Tooth color**
   No record
3. **Missing teeth**
   1 finding
4. **Decay and endodontics**
   1 finding

5. **Restorations and prostheses**
   No record
6. **Bite and function**
   1 finding
7. **Gums and bone support**
   No record
8. **Tooth structure and wear**
   No record

No record does not mean an area is healthy or that it has been assessed.

3 recorded findings | 5 included procedures | 14 referenced teeth

planificadordental.com | hola@planificadordental.com

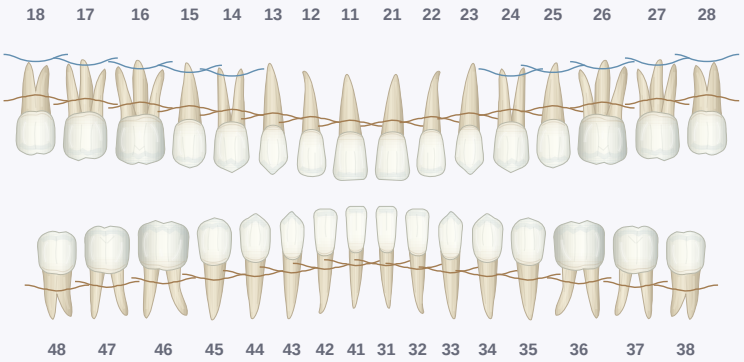

DEMO - fictional data and amounts - not a clinical document

Your plan at a glance

A visual reference for discussing the findings and proposed treatment.

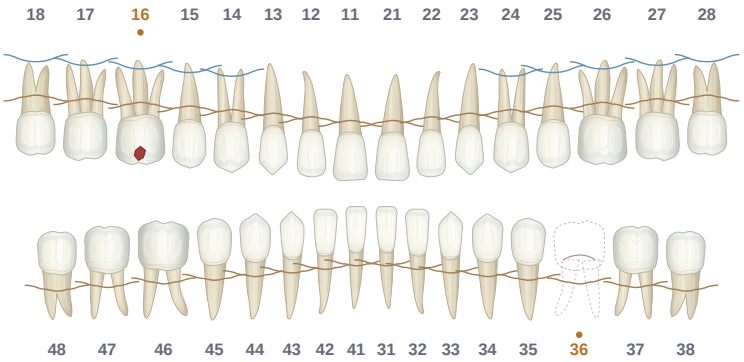

Illustrative anatomical reference

A general diagram. It does not describe your anatomy or an expected result.

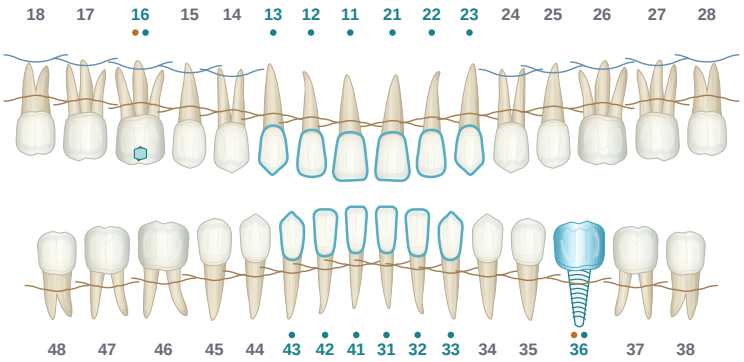

Recorded findings

A representation of the records included in this report.

Treatment proposal

Included procedures only. This does not indicate completed treatment.

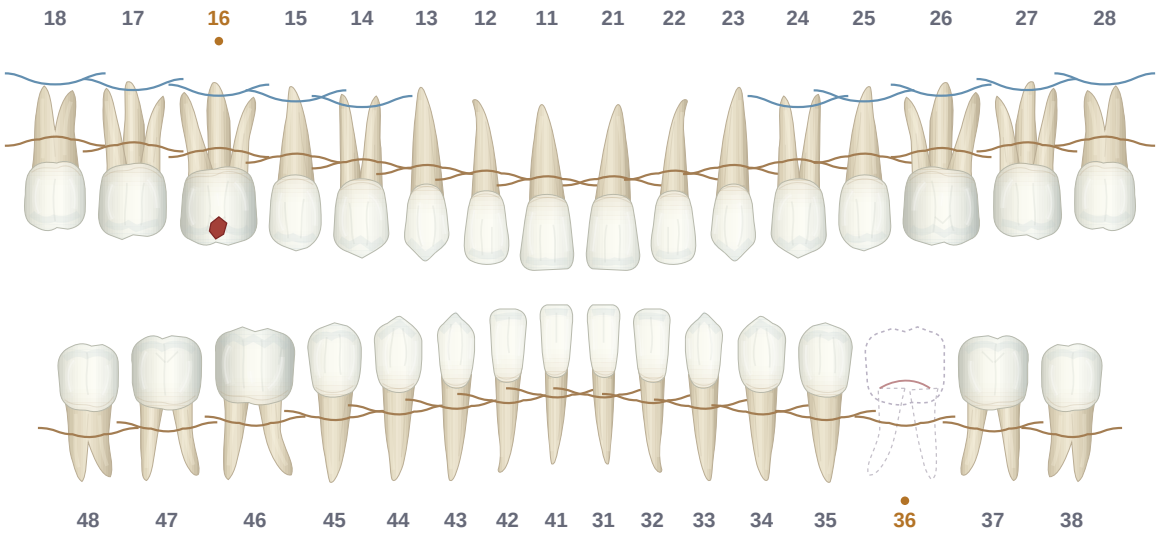

Numbering: FDI. These diagrams help explain the plan. Your clinical assessment and the clinician's records determine your individual situation.

DEMO - fictional data and amounts - not a clinical document

Recorded findings

Findings documented by the treating clinician.

Numbering: FDI

Finding · Missing tooth: 36

Finding · Decay: 16

Illustrative diagram of plan records. Default anatomy does not confirm a tooth is present.

Finding	Teeth and surfaces	Degree / status	Notes
Tooth decay	16 Surfaces: Occlusal	For clinical assessment	Example of a finding located on the chewing surface.
Missing tooth	36	-	The missing tooth is identified to explain replacement options.
Bite discrepancy	-	Crowding	The example shows overlapping teeth. Professional assessment determines its extent and the available options.

DEMO - fictional data and amounts - not a clinical document

Tooth decay

Loss of tooth structure associated with decay. Clinical assessment determines its extent and management options.

Decay affects the hard tooth tissues. Examination and appropriate imaging assess depth and proximity to the pulp; the diagram does not measure that depth.

Teeth: 16 · Surfaces: Occlusal

Recorded characteristics: For clinical assessment

Clinician notes: Example of a finding located on the chewing surface.

Missing tooth

One or more teeth are absent. The location and local conditions are recorded to plan alternatives.

Replacement options are considered according to location, available support, neighboring teeth and personal preferences. The plan identifies included components and stages.

Teeth: 36

Clinician notes: The missing tooth is identified to explain replacement options.

Bite discrepancy

A relationship between teeth or jaws requiring bite analysis and, when appropriate, orthodontic assessment.

The bite describes how the upper and lower teeth relate. Position, spacing and overlap findings may coexist; each selection shows what the clinician recorded.

Recorded characteristics: Crowding

Clinician notes: The example shows overlapping teeth. Professional assessment determines its extent and the available options.

DEMO - fictional data and amounts - not a clinical document

Crowding

The recorded area shows overlapping or rotated teeth associated with insufficient space.

Schematic reference

Recorded feature

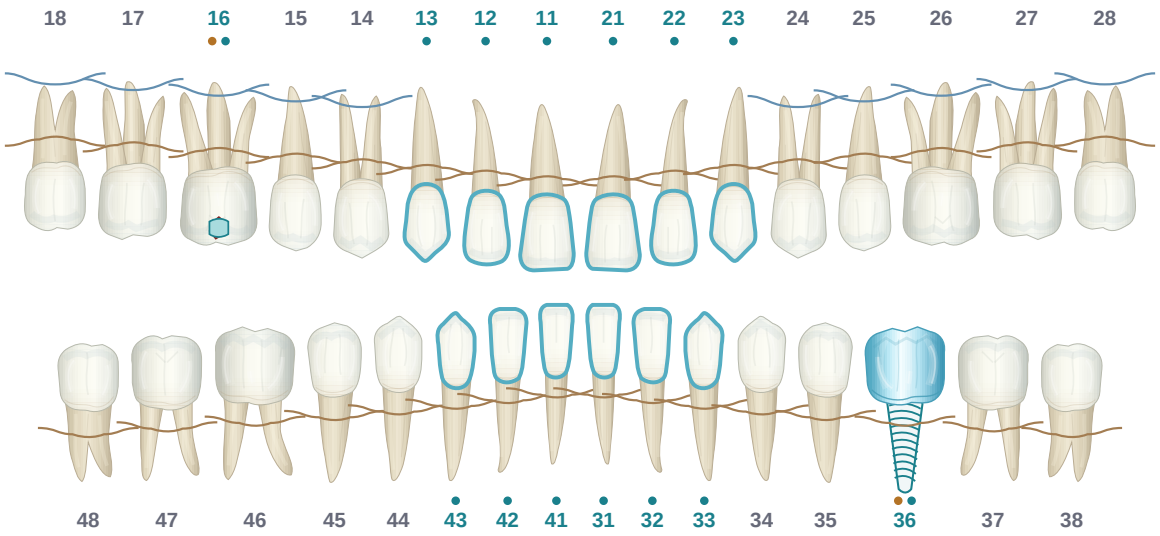

Educational illustration; does not represent measurements or a predicted result.

Proposed treatment

Procedures included in this proposal and their treatment stages.

Numbering: FDI

Finding · Missing tooth: 36

Finding · Decay: 16

Proposal · Restoration: 16

Proposal · Implant fixture: 36

Proposal · Implant-supported crown: 36

Proposal · Aligner: 13, 12, 11, 21, 22, 23, 43, 42, 41, 31, 32, 33

Illustrative diagram of plan records. Default anatomy does not confirm a tooth is present.

The proposal does not change findings or indicate completed procedures. Optional items do not alter this diagram.

Procedure	Teeth and surfaces	Qty.	Unit price	Disc.	Amount
Comprehensive dental assessment Stage: 01. Assessment and planning	-	1	$75.00	0%	$75.00
Composite restoration Stage: 02. Restorative care	16 Surfaces: Occlusal	1	$125.00	0%	$125.00

DEMO - fictional data and amounts - not a clinical document

Procedure	Teeth and surfaces	Qty.	Unit price	Disc.	Amount
Clear aligner treatment Stage: 03. Alignment and follow-up Educational appliance illustration. It is not a simulation of an individual outcome. Sequence and duration require professional planning.	13, 12, 11, 21, 22, 23, 33, 32, 31, 41, 42, 43	1	$1,800.00	0%	$1,800.00
Titanium dental implant Stage: 04. Tooth replacement Illustrative stage after planning and preparation of the space.	36	1	$900.00	0%	$900.00
Implant-supported crown Stage: 04. Tooth replacement	36	1	$700.00	0%	$700.00

Amounts by stage

Stage	Amount
01. Assessment and planning	$75.00
02. Restorative care	$125.00
03. Alignment and follow-up	$1,800.00
04. Tooth replacement	$1,600.00

Sum of included procedures after line discounts and before the overall discount and tax.

Subtotal **$3,600.00**

Total investment **$3,600.00**

Comprehensive dental assessment

Clinical examination and history review to define findings, priorities and options.

Records help study the case and communicate the scope of the plan. The clinician determines which are necessary and how they are used in planning.

DEMO - fictional data and amounts - not a clinical document

Composite restoration

Restoration of part of a tooth with composite, according to the available tooth structure.

Material replaces the indicated part of the tooth. Shape and bite contacts are adjusted, and care is defined according to the material and treatment stage.

Clear aligner treatment

Planned tooth movement through a sequence of aligners and professional reviews.

Movements and goals are defined from case records. Treatment requires reviews, appliance care and a retention plan on completion when appropriate.

Clinician notes: Educational appliance illustration. It is not a simulation of an individual outcome. Sequence and duration require professional planning.

Clear aligner treatment

Proposed appliance

Educational illustration; does not represent measurements or a predicted result.

DEMO - fictional data and amounts - not a clinical document

Titanium dental implant

Placement of an implant to support a rehabilitation defined by the clinician.

Planning defines position, support and relationship with the prosthesis. Surgery and restoration may correspond to separate stages or items; subsequent maintenance is needed.

Clinician notes: Illustrative stage after planning and preparation of the space.

Implant-supported crown

A single-tooth restoration on an implant with components and material specified in the plan.

Restoration design and its relationship with gums, neighboring teeth and bite are defined. Records and try-ins help agree on shape, color and care.

Payment options

Deposit (40%)	**$1,440.00**
Remaining balance	**$2,160.00**
6 installments	**$360.00**

Illustrative payment schedule. This is not a quotation or an offer of clinical services.

Let's discuss your plan

This report brings together the findings and options recorded by your clinician, so you can review each stage at your own pace.

The illustrations explain the plan and do not predict your individual result. Before treatment, your clinician will review the alternatives, timing and outstanding questions with you.

Let us know what you would like to discuss. Thank you for considering our team to care for your oral health.

Notes

This fictional case shows how to bring findings, alternatives and an estimate into one document. Procedures and prices are used only to demonstrate the software. They are not clinical recommendations or a financial offer.
